

WHY BAPRO?

INNOVATION

The only BAPRO company have innovation system double work. FIRST (mixing the dry material with water and pumping) and SECOND (only pumping the finished wet material). This is new technology and new quality. If you looking for plastering machine our proposal is the best for you. So, you should contact with us.

These are our arguments for you, why you should buy only BAPRO machines.

A frequent problem before buying a machine is a choice. On the market there are many different machines. Therefore, you should do a comparison of a number of factors, and then find the answer to the question posed earlier. We have some advice, here they are.

Price. This is the first criterion that is usually taken into account. Nothing could be further from the truth. It

FIVE YEARS WARRANTY

We are confident quality, so as the only BAPRO company offer an impressive 5 year warranty for trouble-free operation.

HIGH QUALITY and THE BEST STANDARD EQUIPMENT

We have a few reasons why you should buy our product. For many years we doing analyzing, this type of machine we collected information from the user as it look reliable machine. All comments has been examined by us resulting in today's our product. Here are a number of details (technologies) that distinguish our machine, placing it as the market leader at the same time guaranteeing a long time reliability and flexibility efficient operation.

www.baproglobal.com

is worth checking whether the price relates to the quality and covers all elements, such as equipment and technical package - service. This is an important point but not the most important.

Application. It is worth before buying ask yourself, what machine you are looking for and for what work? Check its technical capabilities.

Equipment. You should make sure that you are buying a complete machine and equipped with the necessary instrumentation. Only high-quality components guarantee a safe and smooth operation. No many important additions makes the machine incomplete, thus exposing the buyer to further unforeseen costs.

Operating costs: This is a point, that is often forgotten when choosing a machine, but you should remembering.

Our advantages

- ▶ 5 year warranty !!
- ▶ constant access this spare parts
- ▶ professional service
- ▶ full standard equipment machine
- ▶ reputable components
- ▶ low operating costs

We Believe That the evaluation criteria Indicate That BAPRO deserve for your interest. So, ask us about the details of the offer.

Why BAPRO machines ??

High-performance **compressor type HANDY K2** gives optimum spray material. Is maintenance-free and does not contain oil. **Water block** made of stainless steel. **Dual water filtration system** through the use of filters, cleaning protects the all components.

Water pump type 50M ensures the continuity of work to stabilize the water pressure and provide the best consistency of the mortar.

The best industrial **automation system** includes LEDs, enhanced aesthetics contactors and provides trouble-free control of the whole machine (high standard of work).

We use only special reinforced gearmotor power 5,5 kW and 0,55 kW with safety sensor security. We use yet special reinforced shaft, special gears and reinforced bearings), increased rotational speed of 416 rpm for 5,5 kW because gives a rapid process of spraying. Gearmotor 0,55 kW =29 rpm.

Very good **equipment** and high quality (aesthetics) provides safety and convenience continuous work. Examples include material hose in a triple braid (white color) hydraulic encased safe and permanent type camlock connector "male" and "female". Connector "male" also is rotatable so that the plasterer at any time to quickly set proper spray angle. We have also useful material spray gun 100cm in length with head angle and providing a conical nozzle greater freedom to spray the upper stretches of the walls. It is only a few examples standard equipment BAPRO machines!

Multi Elemental construction is reinforced structure gives good possibilities transport of maneuver in the plumb or level. Transport is easy because all handles are reinforced and ergonomically placed to provide convenience when transporting the machine. We offer system of four wheels rotatable about 360 degrees to facilitate the movement. Overall dimensions of the machine includes the parameter standard euro-pallets 120x80cm. Total weight is only 260kg.
